

HUFSD has designated in our Re-opening Plan a COVID-19 Safety Coordinator (Mr. James Clark), as well as a COVID19 Safety Coordinator

In cooperation with the School District Medical Director, School Nurse, and the COVID-19 Safety Coordinator individuals exhibiting symptoms of Coronavirus will be referred to their personal physician for determination of appropriate treatment and the need to be tested. HUFSD will also identify other sources in the community available for referring, sourcing, and administering testing, particularly if large-scale testing is needed. Current testing sites available in Nassau County and throughout New York State can be accessed by going to <https://coronavirus.health.ny.gov/find-test-site-near-you>.

Suspected staff as well as students who have been tested for COVID-19 or who have signs and symptoms of COVID-19, should remain at home and not come to school until results are known. Any close contacts of a pending case's results should also remain at home and isolated until the results of the test are known. A positive result will require additional isolation of the case and close contacts elicited as described above. Quarantine and/or notification will be determined by the Health Department in conjunction with the school district. Laboratory testing may take days until results are determined. The Nassau County Department of Health has no control over laboratory testing.

In this situation, the Nassau County Department of Health will attempt to confirm the case. The Nassau County Department of Health will attempt to confirm the case. If a positive result is confirmed, then additional close contacts may be elicited depending on the specifics of the environment, case and potential exposures. If a positive result is confirmed, then the we may make own determination regarding close contacts and potential exposure and exclusions at that time until further information is known.

According to the CDC, a close contact is defined as:

- a) within 6 feet of a positive case for more than 10-15 minutes for 48 hours before case's symptom onset to case's isolation;
- b) exposed to or give care to positive case;
- c) direct touching;
- d) shared food; and
- e) exposed to sneezing or coughing or talking.

Close contacts are required to be quarantined according to NYS Department of Health and are monitored by Nassau County and NYS contact tracing efforts. In some cases, we may decide to make notifications to other students and staff in the classroom or building who are not close contacts. These individuals should be monitored for signs and symptoms but are not part of the contact tracing effort.

The Nassau County Department of Health will only discuss names of cases with appropriate school personnel consistent with HIPAA. No parents or other students will be informed of names or identifying information. We will never email names of individuals in recognition of the fact that email is not secure.

El Distrito Escolar Hempstead ha designado en nuestro Plan de reapertura un Coordinador de Seguridad de COVID-19 (Sr. James Clark), así como un Coordinador para cada edificio escolar. Esta persona será responsable de responder las preguntas de los estudiantes, profesores, personal y padres o apoderados legales de los estudiantes con respecto al Plan de Reapertura de COVID-19 y su implementación. El Coordinador de Seguridad de COVID-19 también trabajará en estrecha colaboración con el Departamento de Salud del Condado de Nassau y otras escuelas para monitorear las condiciones de salud pública y desarrollar conjuntamente estrategias de monitoreo. Esta persona también será fundamental, junto con las enfermeras de nuestra escuela y el director médico, para ayudar al Departamento de Salud del Condado de Nassau con los esfuerzos de localización de contactos.

El Departamento de Salud del Condado de Nassau recomienda que el Coordinador de Seguridad de COVID-19 y otros funcionarios escolares estén capacitados en los conceptos básicos de COVID-19 y el rastreo de contactos y sugiere el curso ofrecido por la Universidad Johns Hopkins en: <https://www.coursera.org/learn/covid-19-contact-tracing?edocomorp=covid-19-contact-tracing>. El

En cooperación con el Director Médico del Distrito Escolar, la Enfermera Escolar y el Coordinador de Seguridad de COVID-19, las personas que presenten síntomas de Coronavirus serán referidas a su médico personal para determinar el tratamiento apropiado y la necesidad de hacerse la prueba. El Distrito también identificará otras fuentes disponibles en la comunidad para referir, obtener y administrar pruebas, particularmente si se necesitan pruebas a gran escala. Se puede acceder a los sitios de pruebas actuales disponibles en el Condado de Nassau y en todo el Estado de Nueva York en: <https://coronavirus.health.ny.gov/find-test-site-near-you>.
